Trisotech selects Eclipse as the base platform for its Business Process Incubator (BPI) product.

MONTREAL, August 30th, 2004 – Trisotech, a leading provider of Business Process Management and Automation Solutions and Software Consulting Services, is pleased to announce it has chosen the Eclipse platform for its Business Process Incubator (BPI) product. Eclipse is well known as the leading platform for Java development tool integration, utilized by Java developers in small and large independent software vendors and in end user organizations in over 125 countries.

“Eclipse is the foremost open platform for tool integration. Using the core Eclipse platform will help ensure that our Business Process Incubator (BPI) product is fully integrated in the entire application development lifecycle of our clients.” said Denis Gagné.

About Eclipse

Eclipse has formed an independent open eco-system around royalty-free technology and a universal platform for tools integration. Eclipse based tools give developers freedom of choice in a multi-language, multi-platform, multi-vendor environment. Eclipse provides a plug-in based framework that makes it easier to create, integrate and utilize software tools, saving time and money. By collaborating and exploiting core integration technology, tool producers can leverage platform reuse and concentrate on core competencies to create new development technology. The Eclipse Platform is written in the Java language and comes with extensive plug-in construction toolkits and examples. It has already been deployed on a range of development workstations including Linux, QNX, OSx and Windows based systems. A full description of the Eclipse community and white papers documenting the design and use of the Eclipse Platform are available at <http://www.eclipse.org>.

Trisotech
