TRISOTECH ANNOUNCES THE ACQUISITION OF YORTAR

MONTREAL, December 12, 2005 – Trisotech announces the acquisition of Yortar Sytems Inc., a Canadian firm specialized in the definition, implementation and use of advanced systems/software engineering processes and techniques in Monitoring/Diagnostic Systems and in Test and Simulation Environments.

“Yortar will continue to operate as an independent entity, however Trisotech proven expertise in business processes management, in software project management and in software project staffing will increase Yortar capabilities and efficiency in delivering best of breed solutions”, commented Mr. Denis Gagné, chief executive officer and chief technology officer of Trisotech.

Mr. Richard Bélanger of Yortar, will assume the position of Vice President Engineering. Mr. Bélanger will continue to lead and manage Yortar technology investments and delivery.

Yortar was created in 1988, and since then, has become a contractor of choice for the conduct of Systems Integration and Systems/Software Development projects.

Yortar has been assessed at Level 2 of the Capability Maturity Model (CMM), which validates Yortar’s repeatable and disciplined software engineering process that ensures high-quality, high-productivity and quick time-to-market for its projects and solutions. CMM is used by Governments and industry around the world to measure the maturity of software development organizations and improve the way software is designed and maintained.

“Trisotech financial health and expertise will make Yortar an even more valuable business partner to its clients and prospects.” stated Mr. Martin Laflamme, responsible for Trisotech business operations.

Through the years, Yortar has participated to the design and development of complex and critical systems such as Monitoring and Diagnostic systems on projects such as the Acela (Amtrak) and R142 (NYCTA). Also, under a contract with Bombardier, Yortar finalized the design of the Train Operator Training Simulator and delivered it to the New-York City Transit Authority (NYCTA).

About Trisotech

Trisotech provides Software Consulting Services and Business Process Management and Automation (BPM) Solutions. Trisotech is focused on delivering Agile Services and Solutions aligned with Business Priorities on a simpler Technological Environment. Founded in 1996, Trisotech is a privately held Information Technology company based in Montreal. Trisotech Consulting Services and BPM Solutions are the fruits of the experience gained working with prestigious customers, such as Fédération des Caisses Desjardins du Québec, General Electric Canada, Bombardier Transport, GazMétro, TD Meloche Monnex, Hoffman LaRoche, Imperial Tobacco, etc.

About Yortar

Certified at SEI SW-CMM Level 2 in 2001, Yortar is among the most experienced medium size organizations in Canada for the definition, implementation and use of the advanced systems/software engineering processes and techniques for the development and maintenance of complex systems for critical applications. Its clients include Bombardier Transport, Alstom, New York City Transit Authority and many others.
