
Trisotech participation to the conference “Boule de cristal”

During the annual “Boule de cristal” conference sponsored by the CRIM “Centre de recherche en informatique de Montréal”, held February 16 and 17, Trisotech had the privilege to convey at its table IT executives from the following organizations: Abbott Labs, Agropur, Astral Media, Canadian Space Agency, City of Montréal, Dessau-Soprin, Emergis, Port of Montréal and Sico.

This initiative provided this group an opportunity to listen to internationally known IT and business speakers and share experiences and positions on diverse opportunities and challenges.
