
TRISOTECH UNVEILS ITS BPM COURSES CURRICULUM

MONTREAL, July 24, 2007 – Every enterprise should be aligned around its core business processes to deliver increased value to its clients and its products. In addition, deeper understanding of its processes brings more flexibility and agility, increasing its capability to adapt and address business objectives and challenges.

BPM (Business Process Management) proposed ways and methods to model, analyse and improve business processes.

Trisotech has developed a suite of BPM courses offering an overview of these approaches and methods.

The courses offered by Trisotech are:

- ❖ Introduction to Process Diagramming;
- ❖ Introduction to BPMN (Business Process Modeling Notation);
- ❖ BPMN Advanced Concepts;
- ❖ Introduction to Business Processes Transformation;
- ❖ Introduction to Business Processes Modeling.

Each course is two days and includes practical exercises.
