
TRISOTECH PARTICIPATION AT BPM THINK TANK 2007

MONTREAL, August 22, 2007 – For a third year in a row, Trisotech personnel has actively participated to the BPM Think Tank sponsored by the Object Management Group (OMG).

OMG is an open membership, not-for-profit consortium that produces and maintains computer industry specifications for interoperable enterprise applications.

The third annual BPM Think Tank event focused on the value of BPM standards featuring case studies, tip and tricks and key note presentations designed to help business and IT organizations work together to maximize investment in BPM.

Roundtable discussions allowed practitioners to share their experiences working with BPM software products, tools and methodologies to solve real business problems.

BPM Think Tank's unique gathering of experts and its highly interactive format allows participants to discuss the BPM actual landmark and to participate in its evolution.

Direct exchanges with these BPM leaders allow Trisotech to anchor its solutions and services to these emerging industry standards and market requirements.
