
TRISOTECH PRESENTS AT THE ARCHITECTURE & PROCESS CONFERENCE

MONTREAL, May 9, 2008 – Denis Gagné, CEO&CTO at Trisotech, gave a presentation at the “Architecture & Process” Conference held in Washington DC, April 21 to 23.

The presentation, entitled “**Business Process Modeling – What is possible vs What is useful**” was co-presented by M. Gagné and Prof. Michael zur Muehlen, Director of the SAP/IDS Scheer Center of Excellence in Business Process Innovation from the Stevens Institute of Technology. The presentation provided conference participants with an overview of what is possible and what is really useful when doing process modeling in general and more specifically when using the Business Process Modeling Notation (BPMN).

The “Architecture & Process” Conference is targeted to Enterprise Architects and Program Managers, as well as Business Process Owners, Operations Managers, IT Strategists, and Business Analysts. The conference, sponsored among others by the Workflow Management Coalition (WfMC), included more than forty presentations from leading Private Organizations, Public Agencies and BPM specialists and thoughts leaders.

Material from M. Gagné presentation is available upon demand.
