
TRISOTECH TRAINING CENTER

MONTREAL, April 28, 2009 – In January 2009, Trisotech released its Internet site dedicated to BPM Training.

As a Business Process Center of Excellence, Trisotech offers an exciting and innovative BPM training program. The training material proposed is clear and concise and the “learn and apply” approach gives clients the opportunity to exercise the acquired skills and knowledge through practical exercises at each step of the training.

As a content contributor to the OMG Certified Expert in Business Process Management (OCEB™) program, Trisotech has made sure that the training material covers all the OCEB™ exam references, and provides relevant examples for a better understanding.

The current available courses from Trisotech cover the OCEB™ program and the following OMG standards:

- Business Process Modeling Notation (BPMN) 
- Business Motivation Model (BMM)

The training material is extracted from the “BPM Book of Knowledge” developed and maintained by Trisotech.
