

# BPMN Modeler

The Business Process Model and Notation (BPMN) Modeler is a web-based modeler using the industry-standard BPMN 2.0 notation. Use the BPMN Modeler to document business processes and drive process improvement initiatives. Support change management efforts with animated process models as interactive documentation. Create complete process models that can be simulated for optimization, and exported to a Business Process Management System for process automation.

## The BPMN Modeler allows business and process analysts to:

- Create graphical business process models understandable by business and IT stakeholders
- Animate process models, using links to video and other resources to illustrate process steps
- Simulate process scenarios to predict outcomes and analyze for process improvement
- Collaborate using comments and published animations
- Maintain alignment with reference frameworks or enterprise architecture
- Accelerate model creation with standard workflow patterns
- Bridge the gap between process modeling and implementation

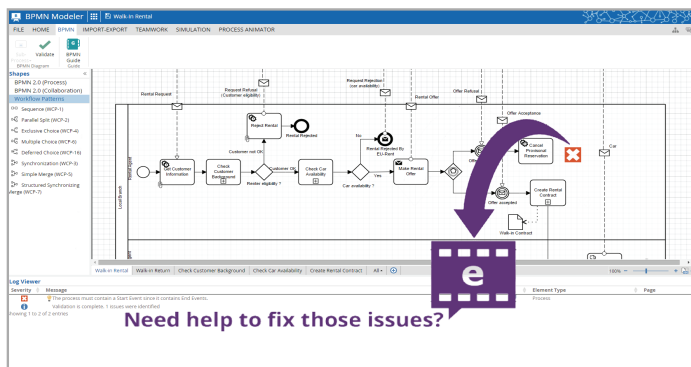

# BPMN Modeler

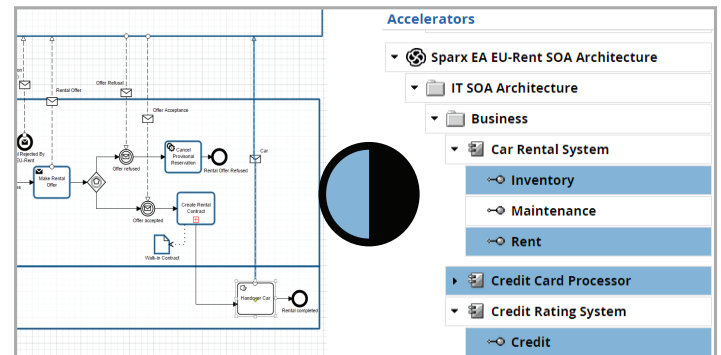

## Create BPMN process models:

- Create BPMN 2.0 process, collaboration and choreography diagrams
- Import models from the Discovery Accelerator, BPMN, XPD, MS-Project, MS-Visio or Fluxicon Disco
- Incorporate pre-defined workflow patterns
- Validate process models against the BPMN 2.0 standard
- Improve BPMN knowledge via just-in-time eLearning (add-on required)

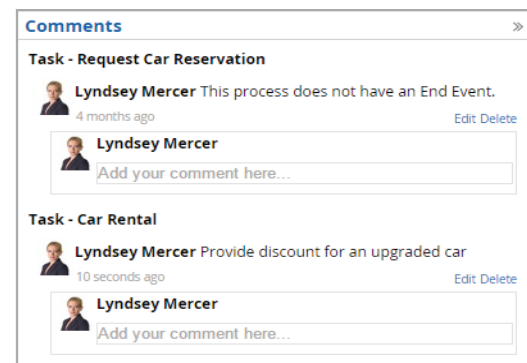

## Analyze and share models:

- Animate processes to interactively step through for logic validation
- Publish process animations with multimedia attachments
- Create simple pre-defined simulation scenarios and flexible expert simulations (add-on required)
- Export executable models, and process diagrams for documentation

## Enhance model information for documentation and external alignment:

- Link a case task to a CMMN Modeler case
- Link from a CMMN Modeler process task to a BPMN Modeler process
- Link a decision task to a DMN Modeler decision
- Create semantic links to industry frameworks and enterprise architecture tools
- Add documentation to elements and models
- Add comments to elements for real-time team collaboration

## Part of the Digital Enterprise Suite

The Digital Enterprise Suite is a complete collaborative cloud-based visualization, innovation, transformation and improvement software suite. It enables non-technical business people to align strategies to operations while considering both the outside-in and inside-out perspectives.

Trisotech's customers gain competitive advantage by obtaining unique insights from the various models created using the Suite, harnessing the power of the Trisotech Digital Enterprise Graph – a semantic model of your organization.

For more information, contact us at [sales@trisotech.com](mailto:sales@trisotech.com) or see our website for more details at [www.trisotech.com](http://www.trisotech.com). All products in the Digital Enterprise Suite run in most modern browsers on desktops, laptops, tablets and mobile devices.
