Digital Enterprise Suite

## FROM STRATEGY TO OPERATIONS

Building new business capabilities in record time

- VISUALIZE
- INNOVATE
- TRANSFORM
- IMPROVE

## YOUR BUSINESS

# IT'S HERE. CAN YOU SEE IT?

Traditional businesses do not take into consideration how fast and how drastically their landscape can change

To thrive in this market, organizations need to change the way they engage their customers, which may mean changing their core business model.

# THE DIGITAL REVOLUTION

By now, every company in the world should be on the lookout for the digital disruption that will threaten their existence.

Your industry has either already been disrupted, is in the process of being disrupted or will be disrupted it in the near future.

# THE DIGITAL REVOLUTION

To keep their competitive advantage, companies must adapt and transform their business model

Companies are facing serious challenges in digital transformation:

- + Mastering Digital Transformation
- + Strategic Planning
- + ERP Blueprinting
- + Application Migration
- + M&A (Rationalisation of operations)
- + Discovering and Documenting Operations
- + Collaborative Process Improvement
- + Decision Management
- + Governance, Risk and Compliance (GRC)
- + Bridging the Business and IT Divide
- + Organizational Change Management

# FOCUS ON VALUE CREATION

Value creation and benefits to customers should shape your digital transformation.

Not just value to your organization.

Outside In

## Value to the Customer

Outside In

Inside Out

## Value to the Organization

Inside Out

To stay ahead, organizations need to reassess the fundamentals of their business;  
from corporate strategy, to operational management.

# ALIGN STRATEGY AND OPERATIONS

Canvases

Analysis

Strategic → **Creative  
Thinking**

**Critical  
Thinking** ← Operational

Brainstorm

Models

Taking into account the perspective of your clients and your own organization

# DIGITAL STRATEGY

Each enterprise must seek its own path to Digital Transformation.

Success may come from reinventing an industry or simply from traditional business models.

Without a digital strategy, an existing business can drift away from its customers and become uncompetitive within its environment.

# DIGITAL STRATEGY

Each enterprise must seek its own path to Digital Transformation.

Success may come from reinventing an industry or simply from traditional business models.

Each enterprise must seek its own path to Digital Transformation.

Success may come from reinventing an industry or simply from traditional business models.

## CLIENT: A NORTH AMERICAN DAIRY INDUSTRY LEADER

Merger & Acquisition and ERP Blueprinting

# NORTH AMERICAN DAIRY INDUSTRY LEADER

"We planned on 12 months to complete the first phase of our ERP aggregation project. We saved 6 months of effort from our 5-person team. Thanks to Trisotech's Discovery Accelerator and BPMN modeler Phase 1 was completed in 6 months!"

Business Process Director

## The Project

- Purchased multiple companies in a vertical integration strategy
- Needed to replace the varied systems by a centralized ERP
- Had to identify which processes would be optimized and implemented

## The Solutions Used

- Balanced Scorecard
- RACI Tables
- Standardized Process, Decision and Case Models (BPMN, DMN, CMMN)

## The Challenges

To aggregate multiple ERP platforms:

- Identify key business processes
- Eliminate duplications
- Deployment of the final processes
- Test after deployment in the new ERP system

## The Results

- Client saved 6 months of a 5-person team
- Processes were improved and are now deployed in ERP
- Now using saved time to eliminate errors and save costs, positioning the company for future growth!

# CLIENT: BOOK ZURMAN, CONSULTING COMPANY IN THE US HEALTH INDUSTRY

Digitization and Collaborative Process Improvement

# BOOK ZURMAN, A US-BASED CONSULTING COMPANY IN THE HEALTH INDUSTRY

“The use of Trisotech Tool Set was key in the speed and integration of the three modeler types. Their Triple Crown solution allowed us to meet our goals faster and with less effort as the tools are integrated.”

Stephen White,  
Senior Consultant

## The Project

- Mandated by large US Federal Healthcare provider
- Needed to develop new modeling techniques
- Use techniques to define clinical guidelines and patient care coordination

## The Challenges

- Aging systems that required upgrading
- Improving clinical guidelines and best practices
- Handling both gov. and non-gov. healthcare requirements

## The Solutions Used

Standardized models (BPMN, DMN, CMMN) to provide clinical guidelines and clinical decision support that are:

- Documented
- Automatable

## The Results

- Digitized clinical guidelines and best practices in record time
- Used international OMG standards for model interchange
- Created Shareable Clinical Pathways
- Increased transparency and faster time-to-market for their clients!

# CLIENT: PROFIT SOFTWARE

From Business Rules to Decision Models

# PROFIT SOFTWARE

"Using the Trisotech DMN Modeler, we are able to migrate our clients existing rules engines into our software faster and with less stress for our clients. Saving errors, time and money."

Olli Rauhala,  
Software Architect and  
Business Rules Specialist

## The Project

Their clients are converting their older insurance systems to a new application called "Profit Life & Pension", developed by Profit Software.

## The Challenges

- Used legacy BRMS to convert older insurance systems to "Profit Life & Pension"
- Had thousands of individual rules inside the system

## The Solutions Used

Profit Software is using DMN Modeler from Trisotech for mapping rules and executing those DMN models using Drools DMN engine and jBPM 7.

## The Results

- Developed a smoother transition method using DMN
- Switched from business rules to decision models
- Lowered costs, eliminated errors and saved time for their clients
- Now fulfilling their client's requirements in a fraction of the time!
