

# Landscaping

The Landscaping Modeler is a cloud-based strategic planning and lightweight business architecture tool. Creative strategic thinking and unconstrained brainstorming is supported with electronic sticky notes to capture quality ideas in an intuitive and easy-to-use environment. Create business architecture blueprints to bridge the gap between strategic brainstorming and the operations of your organization.

The Landscaping Modeler enables strategic planners, analysts and architects to:

- Collaborate with relevant stakeholders to rapidly obtain consensus on strategy formulation
- Easily capture creative strategic brainstorming sessions on an electronic whiteboard
- Save whiteboards and models in shared folders for sustainability and availability of information
- Use recognized methods and visual canvases to help develop ideas
- Rationalize ideas and transform brainstorming notes into reusable operational elements
- Organize ideas and operational elements into meaningful business structures
- Relate different views of their business architecture
- Create a shared mental model via navigable visual maps of their business architecture

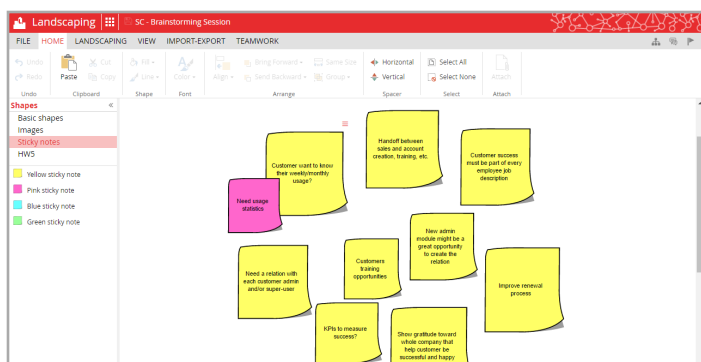

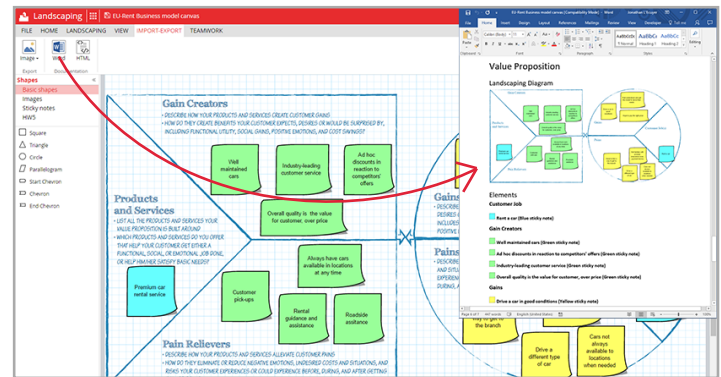

# Landscaping

Start from scratch on a digital whiteboard or use recognized methods and visual canvases to guide you as you develop ideas:

- Use electronic sticky notes, simple shapes or import images to formulate ideas
- Work with recognized canvases or request your own personalized ones
- Refer to canvas instructions for consistent capture and categorization of ideas
- Attach files of different formats to your notes from any source

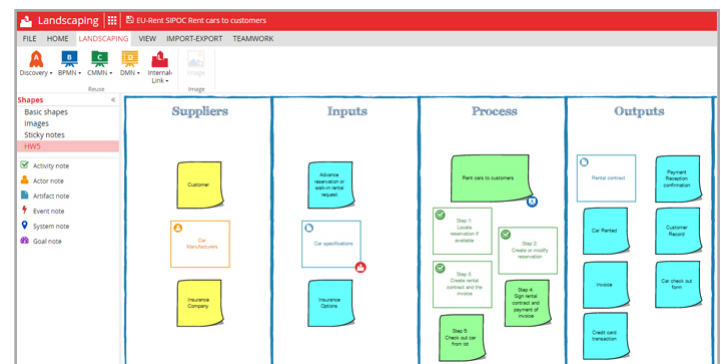

Support visual representation of business architecture in a simple technological environment:

- Turn free-form ideas into meaningful business entities, such as actors, activities and events, reusable through the Digital Enterprise Graph and Trisotech modelers
- Hyperlink different canvases and whiteboards into the same document for a complete overview of your business structure
- Communicate business structure and vision through your organization to foster operations-to-strategies alignment

Facilitate collaboration between teams and team members:

- Have asynchronous working sessions using various iterative versions of the same document
- Host real-time crowdsourcing working sessions with team members via the Ideation tool from the Trisotech Digital Enterprise Suite
- Engage others with social commenting to improve co-operation within your organization
- Generate electronic reports to easily capture the work done in the session and communicate ideas to other teams

## Part of the Digital Enterprise Suite

The Digital Enterprise Suite provides tools for non-technical business people to visualize, transform and improve their digital enterprise, exposing unique insights into relationships between models.

Constant alignment of models is enabled by an intelligent fabric: the Digital Enterprise Graph. Models created in the Digital Enterprise Suite tools and in third-party enterprise architecture and modeling tools, become part of the Digital Enterprise Graph to build a global and unified business context from the bottom up.

Live crowdsourcing of ideas is globally available throughout the Digital Enterprise Suite applications. Invite others to contribute in real-time to your work from any device or computer via the Ideation tool.

The Landscaping Modeler is available as part of a Digital Enterprise Suite subscription. See the Trisotech website for more information, to start a free trial or to request a quote. All products in the Digital Enterprise Suite are cloud-based and run in most modern desktop and mobile browsers.
