

Landscaping

The Landscaping Modeler is a cloud-based strategic planning and lightweight business architecture tool. Creative strategic thinking and unconstrained brainstorming is supported with electronic sticky notes to capture quality ideas in an intuitive and easy-to-use environment. Create business architecture blueprints to bridge the gap between strategic brainstorming and the operations of your organization.

The Landscaping Modeler enables strategic planners, analysts and architects to:

- Collaborate with relevant stakeholders to rapidly obtain consensus on strategy formulation
- Easily capture creative strategic brainstorming sessions on an electronic whiteboard
- Save whiteboards and models in shared folders for sustainability and availability of information
- Use recognized methods and visual canvases to help develop ideas
- Rationalize ideas and transform brainstorming notes into reusable operational elements
- Organize ideas and operational elements into meaningful business structures
- Relate different views of their business architecture
- Create a shared mental model via navigable visual maps of their business architecture

Landscaping

Start from scratch on a digital whiteboard or use recognized methods and visual canvases to guide you as you develop ideas:

- Use electronic sticky notes, simple shapes or import images to formulate ideas
- Work with recognized canvases or request your own personalized ones
- Refer to canvas instructions for consistent capture and categorization of ideas
- Attach files of different formats to your notes from any source

Support visual representation of business architecture in a simple technological environment:

- Turn free-form ideas into meaningful business entities, such as actors, activities and events, reusable through the Digital Enterprise Graph and Trisotech modelers
- Hyperlink different canvases and whiteboards into the same document for a complete overview of your business structure
- Communicate business structure and vision through your organization to foster operations-to-strategies alignment

Facilitate collaboration between teams and team members:

- Have asynchronous working sessions using various iterative versions of the same document
- Host real-time crowdsourcing working sessions with team members via the Ideation tool from the Trisotech Digital Enterprise Suite
- Engage others with social commenting to improve co-operation within your organization
- Generate electronic reports to easily capture the work done in the session and communicate ideas to other teams

Part of the Digital Enterprise Suite

The Digital Enterprise Suite is a complete collaborative cloud-based visualization, innovation, transformation and improvement software suite. It enables non-technical business people to align strategies to operations while considering both the outside-in and inside-out perspectives.

Trisotech's customers gain competitive advantage by obtaining unique insights from the various models created using the Suite, harnessing the power of the Trisotech Digital Enterprise Graph – a semantic model of your organization.

For more information, contact us at sales@trisotech.com or see our website for more details at www.trisotech.com. All products in the Digital Enterprise Suite run in most modern browsers on desktops, laptops, tablets and mobile devices.
