

# Trisotech's DIGITAL ENTERPRISE SUITE

## for Financial Services

Trisotech's Digital Enterprise Suite (DES) is a cloud-based software solution combining concepts of simplicity, usability and collaboration. It brings strategy, design and technology together providing your organization with insight for gaining competitive advantage. More than just modeling, the Digital Enterprise Suite ensures you achieve your desired business outcomes. The suite provides an intelligent fabric that empowers organizational analysis and decisions via visualization from business discovery through to transformation, innovation and improvement.

# DES

## for Financial Services

Here are just some of the things Trisotech's Digital Enterprise Suite can help you accomplish in your digital transformation:

### ENABLING BUSINESS PEOPLE TO DISCOVER AND IMPROVE FINANCIAL OPERATIONS

- Discover and document operations in an intuitive and easy-to-use environment by capturing the processes, cases and decisions that make up the DNA of your organization
- Align operations to reference architectures and industry-specific frameworks like Panorama 360 for financial services and wealth management
- Evaluate and control the impact of change in regulations, policies and trends on your organization's financial operations
- **Gain insights and improve how things get done, organizational efficiency and customer satisfaction**

### IMPROVING QUALITY AND CONSISTENCY OF OPERATIONAL DECISIONS

- Enable business users to design models and verify, test and validate decision logic using business rules
- Make transparency and traceability possible using semantic relationship between various elements and different models
- Enhance compliance level by enabling consistent and standardized operational decisions using the Decision Modeling and Notation (DMN) standard
- Rapidly apply rule changes to gain greater agility and reduce time-to-market
- **Reduce operational and regulatory risk, improve effectiveness and say goodbye to lost revenue and missed opportunities**

### PLANNING AND DEPLOYING DIGITAL STRATEGIES TO ADJUST BUSINESS MODELS

- Generate and capture high quality ideas in an intuitive and lightweight environment that enables creative thinking and problem solving
- Clearly describe and communicate the strategy of your organization by specifying the goals and initiatives needed to achieve your desired business outcomes
- Create a collective understanding of the organization's strategies, processes, decisions and systems
- **Convert high-level brainstorming into meaningful structures and transform your business model to seize opportunities**
